Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. None of the prior art documents contained in the search report reveals a clamping strap for joining two pipe ends as set forth in claim 1, wherein a third web member extends from the innermost end of each of the second web members parallel to the pipes walls and the ends of the clamping strap overlap one another.
2. The above features are neither known from, nor rendered obvious in respect of prior art so that claim 1 therefore meets the requirements of Articles 33(2) and 33(3) PCT.
3. Claims 2 to 6 contain advantageous modifications of the inventive idea embodied in claim 1 and also meet the requirements of Articles 33(2) and 33(3) PCT.

Claims

1. A clamping strap (8) for joining two pipe ends, said clamping strap presenting a shape corresponding to the circumference of the two pipe ends, and where the clamping strap includes a first web member (1) extending parallel to the pipe walls (12, 13), a second web member (2) extending inclined from each side of the first web member (1) and inwards towards the pipe walls, a compressible sealing band (4) arranged on the inner side of the first web member (1) between the two second web members (2) and of a width substantially corresponding to the width of the first web member (1), when seen in use in a cross-sectional direction through the central axis of the pipes (10, 11), **characterised in** that a third web member (3) extends from the innermost end of each of the second web members (2) and parallel to the pipe walls (12, 13), and that the ends of the clamping strap overlap one another.
2. A clamping strap according to claim 1, **characterised in** that it is made as a continuous, flexible strap with two clamping strap ends interconnected by means of a single tightening means (20), said tightening means allowing the clamping strap (8) to be clamped about the pipe ends.
3. A clamping strap according to claim 1 or 2, **characterised in** that the third web members (3) are of a width of at least 5 mm measured in the longitudinal direction of the pipes.
4. A clamping strap according to one of the preceding claims, **characterised in** that the sealing band (4) is made of a woven fibre glass material.
5. A clamping strap according to one of the preceding claims, **characterised in** that it is cylindrical.
6. A pipe end joint where two pipe ends are provided with a bead (9) extending radially outwards from the outer side of the pipe walls (12, 3), and where a clamping
